Sounds good. The sample event shouldn't last more than a day and we will definitely coordinate with you ahead of the field event and discuss our plan with you.

Have a great weekend!

Cheers!

Bill

Bill,

I would say at this point creating your own would be your best bet if we have not made repairs or opened up out dock. I would request that if your sampling would last more than a day the temporary access not be left over night. Gorge is an extremely popular park and I wouldn't want folks to be tempted to access the dock.

Sincerely,

Deidre A. May

Deidre – Thank you for the update. I'm thinking it will be at least a month or more before we'd be ready to collect sediment. If the repairs aren't complete and would it be possible to access the dock if we can come up with a way to temporarily and safely access the dock?

Cheers!

Bill

Good Morning, Mike!

A tree fell and damaged the ADA ramp and gangway to the dock. The ADA ramp has been removed, and the gangway is away being repaired. I have not heard a set timeline for when the repair will be complete, and the dock reopened (COVID also plays a role in reopening the dock).

Sincerely,

Deidre A. May

Hi Deidre: Can you respond about the status of the dock?

Subject: Gorge Dam Floating Dock Access

Hi Mike – Jacobs is doing some planning for another small sediment collection effort and I was wondering if you know the status of the floating dock in the Gorge Dam Pool. Drew Walter was at the site back in April and there were a couple of dock sections missing. We'd like to be able to go out on the dock and collect the sediment in this area. Please let me know if the dock has been repaired and is accessible.

Cheers!

Bill
